

DELAUN REVIV'D

31716/B

252 MEDICAL ADVERTISING.—*Delaun Reviv'd*, viz., a Plain and Short Discourse of that Famous Doctor's Pills, their Use and Virtues. With Choice Receipts for the Cure of Scurvy, Dropsy, Jaundies, Venereal and other Diseases. Sm. 4to., 12 pages, unbound. [c. 1680] £3 3s.

Very Rare. With an interesting reference to William Harvey. This advertising pamphlet, issued without title-page, imprint, or date, was published about 1680. The author, "N.L.", states that he was associated with Harvey: "My own knowledge in Physick I acknowledge to Pharmacy, being bred under that great Inquirer into Nature, Dr. William Harvey, as his Apothecary, who above all Cathartics, having experimented this Pill, commended it to the world, as the most friendly to Nature, and effectually [sic] in sweetening the blood, and maintaining its circulation, whereof (to England's glory) he was the true Author."

Delaun Reviv'd,

Viz.

A Plain and short discourse of that *Famous*

DOCTOR'S PILLS,

Their Use and Virtues.

With Choice Receipts for the Cure of
the *Scurvy, Dropsy, Jaundies, Venereal*
and other Diseases.

*Before I speak to this Famous Medicine, I will declare who Delaun was;
Then, the Price of his Pill and how to take it, and of its several Virtues
in order, in such Plain words, as the weakest capacity may understand:*

And I intreat those who hope for help hereby, would
thoroughly *Read* this short book, and observe my
Directions for their own good and the Authors's
Credit.

THis *Famous* Author was not like any the *Quacks* of this
Age, whom the Honourable London Colleagues could com-
ptrol, as they did *Bromfield* of *Fetter Lane* most defer- who De-
vedly, and compell'd him to pay *Forty* marks; for that, laun was
that he, though the chief of the *Pill-sellers*, was never bred
to Physick, or had Learning enough to understand his
Accedence; Mr. *Scott* in *Grubstreet* Attorney for the Colledge, who
prosecuted many others, will averr this truth: which, if *Bromfield* (or

any for him (can he cannot spell) deny, in *Print*, my *Next* will give you a farther account of the man and his *Medicine*.

No, *DeLaun* was the honour and Ornament of this *Colledge*, and the *Apothecaries Company*; he was first and Founder of their *Hall* where his *Effigies* is now erected; he was *Doctor* and *Apothecary* to *Queen Ann*, *King James*, and *Charles the first*; he had *thirty seven children* by one wife, lived *97 years* and dy'd worth more thousands of pounds which he bequeathed to *Hospitals* and his numerous *Of-spring*, amongst which, he was attended with no less than *sixty Grandchildren* at his lamented *Funeral* in *Black-fryers*.

My own knowledge in *Physick* I acknowledge to *Pharmacy*, being bred under that great Inquirer into Nature *Dr. William Harvey*, as his *Apothecary*, who, above all *Catharticks*, having *Experimented* this *Pill*, commended it to the world, as the most friendly to Nature, and effectually in *sweetning the blood*, and maintaining it's *Circulation*, whereof (to *England's glory*) he was the true Author.

And, this *Pill* having before and since, *past the Test* of the most *Scrutinious*, and in such esteem now, that not only the *City*, *Court*, and *Countrey*, prefer it, but the very *Collegiate Doctors* prescribe it to their *Patients*; and they themselves and *Families* actually take it, from my own *Colledge* hands: which I deny any other to be thus *grac'd*, thus *Justified*.

The Price of, and how to take this Pill.

Note, that in and about *London* the *Poor* (who may fetch them every day, as they use them) may buy *one single Pill* clos'd in a *Paper box* gilt with *Gold*, and costs but *six pence*, yet is a sufficient *Purge* for most *Constitutions*, but, to remote parts I send only *whole Boxes* or *half boxes* of *Tin*, containing *6* or *3*, *Price* three shillings, or *eighteen pence*, sealed with *three Scallop shells* on a *Bend Ingrail'd*, and 'tis hop'd, that none will murmur that every *Pill* should cost *six pence*. A *Lark* excels a *Kite*; And who can expect a *pleasant Purge*, (prescrib'd and allow'd by a *Consult* of the most *towering Judgements*, and *Compounded* of the most *costly Ingredients* that *Art* or *Nature* ever yeilded) for less than *six pence*.

Note further, that this *Pill* is so inviting to the *Eye* and *Smell* and of such *easy Operation*, that those who once take it bid adieu to all other *Physick*; and it's bulk is but as a *grey Pea*, and may be divided into *two*, *ten*, or *twenty Pills* at pleasure, and then, sure none will quarrel at their *Number*.

These *Pills* are alwaies as soft wax, never grow *dry*, or decay in their

*A last-
ing Pill.*

66837

their Virtues, which makes them in such esteem with *Sea-faring men*, and in the *Indies, Virginia, France, Ireland*, and this *Island*, where the spreading *Scurvy* would otherwise eat up the Inhabitants.

Directions how to take these Pills.

Which I earnestly intreat all persons concern'd to peruse well, as they tender their own Health; and, if by their own neglect any miscarriage happen, they will not blame the Author, and through Jesus, the grand Physician of the soul, none may have cause to complain.

First then, 'tis desir'd that none should covet large *Doses* or many *Cautions* *Stooles*, but rather take ten times too little, than once too much, for if this Pill should chance not to purge at all, yet 'tis even then acting in the body as a Balsom, fighting against some hidden Malady, and by the oftner taking of *easy Doses*, diseases are more certainly overcome, nature strengthened, long life and health secur'd.

Note also, that tho' this Pill should not work as you expect it should, this or that day; you must not blame the *Physick*, but impute it to the temper of your bodies; for, what will work with the same person to day, may not work at all another day: the Pill is-alwayes the same exactly Prepared, but our bodies alter.

Cautions and time of Taking the Pill.

Next this, note well, I do not commend this, nor any *Purging Physic* (as some do, that neither know nor care what they say or do) to weak, wasted constitutions, nor to women young with child, nor to Infants less aged then three or four years (these *Pills* being absolute against *Worms, Rickets, and Convulsions*;) and, to such I warn that none give above the third or fourth part of a *Pill*, having strict regard to Age and strength, although I assert it to be the most safe, pleasant, best corrected Physic in the Universe.

Persons of indifferent strength, may take *One*, the stronger one and half, the weaker, half or two thirds, of a *Pill*, and by degrees, more or less, as they desire (and find) them to work.

The Time of taking all quick *Physick* ought to be in the morning, especially in cold weather, least (if taken over night) the Patient, forced to rise, catch cold.

You may take half over night, and the rest next morning; but, the old Physick, and best way is, to take them after the first sleep, or at any time from

one or two a clock till *seven, eight or nine*, in the morning; take them alone, or in the pap of an *Apple, Egg poached, Beer, Ale, Coffee, Tea*, or other liquor you can best swallow them in.

what to
eat or
drink.

You may stay at home, or go abroad, drink, or not drink after them, at your pleasure: but, certainly a *warm* chamber with tender persons, and some warm *Ale, Broth, posset, &c.* suits best with all *purging Physic*.

The Patients may eat their *usual* food to *Dinner* and *Supper*, but *hot* and *fresh* is most suitable.

Invete-
rate dis-
eases re-
quire
much
physick.

Those whose Diseases have been of long standing, ought to take a dose every other day for four or five dayes or longer, as strength permits, and the Disease abates. Many persons take them going to Bed, with great *Ease* and *Convenience*, especially such as go late to Bed, and have business next day.

VIRTUES of this P I L L.

Stomach

This Pill is chiefly appropriated to the *Stomach*, and with such *Effects*, that though other Medicines may sometimes succeed, yet no other is *Æquivalent* in *healing, cleansing, comforting, and settling* this bow-el: and, at the same time, reaching the very *Head*.

The
head's
excellen-
cy.

This *Physick*, and this *only*, hath *prerogative* to examine that Noble part, that seat of *Reason*, wherein are lodged the internal senses, the *will, memory, imagination, understanding, &c.* and all the external senses also depend on this Tower of *Pallas* the *Head*.

The *Brain* is the off-spring of all the *Nerves* and *Fibers*, which distribute themselves and convey the *Animal Spirits* to all the distant parts of man.

The very *Heart* it self owes its affections and motion. (I do not mean the pulsific motion) to the animal spirits.

Head is
the All
of man.

The *Head*, in a word, is the *All* of man, and, this *Prince* of Pills being sole Ruler there, who shall doubt it's power in managing the meaner parts of that *microcosm*.

HEADACH

Head
pains.

Kephalalgia or pains or *Aches* in the whole, or any part of the *Head*, are removed with *six or eight* Pills, taken in twice so many dayes, according to the first Directions.

But, if the Disease hath been *habitual*, and *inveterate*, the sick per-
son

son ought to try this method again, and again after a week or ten dayes discontinuance, according to strength, &c.

In the same manner, are cur'd these following Diseases, of the Head, Eyes, *Viz.* Apoplexy, Epilepsy, Dropsy of the Brain, Madnes, Frenzy, Ideo-
risme, swimming, or noise in the head, weak memory, Giddines, stupidity, Teeth.
weak or sore Eyes, Deafness or Drumming noise in the Ears, or Head, Taste.
want of smell or Taste, Tooth-ach, Kings Evil, swelling about the Neck, Smell.
Throat, Jawes, or Gums,

Lethargy, which (*vi vocis*) denotes a sluggish forgetfulness, and is an excess of sleep and eclipse of Memory, with a Fever, as the famous Willis describes it, if I mistake not his Sense.

Vertigo which is a confusion of the Animal spirits, when the sight is perswaded that all its objects turn round.

Palsie, which is a Laxation of the Nerves from their true bent and tensity, whereby Motion or Sense, or both, in the whole, or any part of the body, cannot, as usually, be exercised.

And, besides these Diseases of the Head there are other, which are rather ill habits, *viz.* A Coma or, continual sleeping, Pervigilium, or a restless watching, an Incubus, or Night-mare, which is a disease of the Breast and brain, Melancholy a Disease of the Heart, and Head.

And be assured (*Good Fellows*) that nothing in Nature can carry off Sottish dulness after hard drinking, like this Pill, which settles both
brain and stomach, Sweetens the Drink-Tainted Breath, and Creates an
Appetite to Admiration.

GOUT

Which though it seize parts far remote from the Head *viz.* the hands or feet, &c. and then the joints only (*inter internodia Ossium*) is a Di-Willis disease of the Head and Nerves, which arise thence, and (consequently) Morb. (I hope) none dare dispute this Pills Prerogative and approved Effects in Caput. this Distemper.

CHOLICK

Which does not only afflict the Colon, or great Gut, (as some think) Cholick, but also the whole Region of the belly, and chiefly the Mesentery, Disease (where there are many great Nerves) is also a Disease of the Head, and of the cured with these Pills, taken in Clysters, in the fit as well as afterwards, HEAD.
Viz. thus. Take

Certain
safe or
cure for
Collick
Wind
Gripes.

Take of Camomile flowers, Juniper berries bruised, of each half an
an Dunce, Firr tops, Gallows of each half an handful, Annis and Fenel-
seeds of each two drachms; boyl them in two quarts of Posset ale; take
three quarters of a Pint of this liquor, add half an Dunce of Turpentine
dissolved in the yolk of an egg, six of Delauns Pills, one Dunce of Cypser
Sugar, administer it: and again, and again, if need require; drinke the
rest of the liquor sweetned with Sugar, three or four Dunces at a time,
and when the pains cease, purge frequently with this Pill, which will
root out the very seeds of this miserable distemper.

This method also Cures, Gripes, Wind, Stone, Collick, Ulcers in the
Kidnies, &c. Deo soli gloria.

SCURVY:

Descrip-
tion of
the scur-
vy.

'Tis not possible to describe it in its severall Shapes, being a Distem-
per that insinuates, creeps into, and mixeth it self with all other dis-
eases; some Authors assigne forty, some fifty, others seventy symptomes
thereof, which I have not here room enough to recount; but, since 'tis
certainly caused through the fault of the stomach and Pancreas and the
blood's being degenerated from its spirituous balsamic condition, into
a sharp salt liquor, and complicating it self with all the aforementioned
diseases of the Head, 'tis too true, too apparent, to be a disease thereof.

Scurvy
differs
little
from the
French
Evil.

For when the teeth grow loose, hollow, black, rotten, the gums
foul, stinking, the mouth and lips black, dry, ulcerated, the tongue
raw, swollen, discoloured, what else is the cause but the sharp Recre-
ments of the Nerves, that come from the brain? black, blew, reddish,
(less and bigger) spots, scurffs, pimpled face, armes or brest, tetters,
pains in the limbs, shortness of breath, purfiness, pricking, shooting,
itching, shifting pains in the arms, shoulders, legs, knees, ankles,
restless fearful dreams, sour belching, reaching, and vomiting in the
morning, weak stomach, nauitious appetite, and many other signs there
be of this mischievous malady, which appearing so often like the P O X
and often as dangerous, the scorbutic husband or wife, are apt to suspect
themselves infected by their Chast bedfellowes, and one friend to accuse
another of unchast embraces, 'cause the effects of the Scurvy differ so little
from those of unclean Venery.

And, inasmuch as no Pill or other Physick on earth hath succeeded
like

like this, no Pill, but this *only*, is approved of by the most Learned Colledge in the World, and in such request in Court and City, sure the hitherto deluded Country, will now see it's error, and embrace this safe and certain Physick, which so firmly Conquers this *Rebellious* Pest, and with a friendly close with Nature, thrusts forth the Excrements with ease and safety, separating the diseasy matter from the mass of blood, rendring the heavy body, *brisk, active, and lively*, giving a vital oyl to the *Lamp of the heart*, in order to *health*, being the *sublime bliss* on this side *Heaven*.

*The Col-
ledges
Allow-
ance.*

But this *Taint* admits of a more *speedy* Conquest, if the Patient use brisk Exercise, and every Morning and Afternoon drink the Juice of *Scurvy-Grass, Watercresses, Brooklimes*, with Oranges, or this

Receipt for the Scurvy.

Take of Scurvy-grass six handfuls, Watercresses, Brooklimes, Elder-
flowers, Broom tops of each three handfuls, Horse-radish, Parsly, and
fennel roots, winter bark (if you have it) of each three Dunces, Corian-
der, Mustard, Carrot seeds, of each two Dunces, the roots being sliced,
herbs cut, seeds bruised, steep them in six or seven Gallons of Ale, for four
or five daies, drink half a Pint three or four times a day for twenty or
thirty daies. The Poor will praise, and pray for me, for this cheap but
excellent Receipt, the Rich may infuse them in white or Rhenish wine, or
distil them, and if they add of Guaiacum, China, Safras, of each
half a pound, of Nutmegs four ounces, 6 Oranges sliced, it will be more effe-
ctual, and (possibly) one of the best of Medicines: insomuch that continuing
this Drink as aforesaid, and taking Delaune's Pills, two or three times weekly,
and both before and after this Method, as also eating the first mentioned
three herbs as Sallad, with Elder Vinegar, Rubbing the gums and mouth
daily with Olive pickle, scaling the teeth, &c. This Scurvy Pest (or eviscina)
will soon submit and vanish.

*Receipt
for the
Scurvy.*

Receipt for the Dropsy, Jaundies, &c.

In diseases of the Liver, and Spleen, Agues, Dropsies, Jaundies, add
to this Receipt more White-wine, good store of Turmeric roots, Bar-
berry bark, Celandine and Vine leaves, more Broom, some Saffron,
and with frequent taking of this Pill (which purges Phlegm and Choler,
warms and strengthens the Stomach, creates a good appetite and Di-
gestion) under God you may depend upon relief.

*Liver
Spleen
D. of
Jaundies
Stomach
Choler
phlegm*

Diseases of the Brest.

It is very effectual in disquiet Coughs, Catarrhs, Phthisic, &c. as far as purgation is requisite; and nothing better after Fevers, small Pox, Measles, Agues, &c.

Wormes, Piles, &c.

It kills all wormes in the Stomach and Gutts, in all Ages, Sexes, and Constitutions, Cures Piles, anointing the infected part with *Ointment of Roses* and *Egyptiacum* (which the Apothecaries sell) equally mixt.

WOMENS DISEASES

Womens
diseases.

barren-
ness.

As to Distempers that afflict this Sex, this Pill claims Priority, inasmuch as *Hysteric Passions* or *Mother Fits* are caused through the vice of the Nerves, and consequently the overstuffing of the Ventricles of the stomach, as the uncontradictable Famous *Willis* affirms, and from the same Cause, *Barrenness*, *Green Sicknes*, want of Monthly benefits, (and for that reason this Pill is dangerous for Women with child) it strengthens weak backs, Cures *Whites*, &c. Reducing the *Womb* to an excellent state; in order to *Procreation*, which causes *Experienced Midwives* and *Heirless Dames* to flock from all parts, for these Pills which are especially proper to be taken with *Tunbridge*, *Epsom* and other *Mineral Waters*; being so great a Cordial and warmer of the *Genital parts*, which hundreds can Attest.

GONORHOEA.

Or involuntary issuing of Fœtid matter from the Privities, with *Running Sharpness* of Urine, swelling in the Testicles, Warts, painful erection of the Privities, weeping remainders after ill begun and un-
 effected Cures by unskilful pretenders. This Pill, though it hath not in it one Grain of Mercury (which many think to be the only Specific
 against

against *Veneréal Distempers*, but I deny and dread it) most effectually Cures; the Patient being temperate and purging freely every day, or as often as strength permits, for about twenty dayes, less or more, as the case presents. *Running of the Reins.*

But, both in this and a *Confirmed Pox* when not only the Mass of Blood is corrupted, but also the bones tainted and tortured with restless night pains, Shankers, Warts, swelling in the Groin, the Nose or Pallate sinking, or Ulcerated, Nodes, and dreadful *Memorandums* in the Shins, Arms, Shoulders, Head, &c. I advise the sick to twenty or thirty dayes *Diet-drink*, which I have alwaies in readines, at two shillings the quart, or the *Ingredients* which may be sent to any part of England, with directions to make it at home, since it will not keep long enough to be sent into the Countrey. Which pleasant liquor, with the help of this *Pill*, taken twice a week, and sweating as often, perfectly roots out the *Veneréal* venom; and in truth, the same drink is no less *Effectual* against the *Gout*, *Rheumatism* and *Scurvy*, for, *Omne majus in se minus*: wherefore, those *squeamish Dames*, who disdain the Medicines that cure this Malady, are blame worthy, inasmuch as (if they be not *Mercurial* ones,) they are as safe, and render the blood as sweet as *milk*, and, consequently, cannot but cure *less dangerous Distempers*. To those that cannot attain to my *Diet drink*, I commend this Cheap but very effectual one. *Pox.*
Diet drink & sweating necessary in the Cure of the Pox & Scurvy

Take of *Sarsaparilla* white and mealy, twenty ounces; of crude *Antimony* in powder twelve ounces, ty'd up in linnen: of *Flinty China* five ounces, of *Sassafras*, *Guaicum*, *Mastick-wood*, *Harris-horn*, *Ivory*, of each three ounces, of *Bark of Guaicum*, of red and white *Saunders*, of each an ounce; steep them in twenty pints of spring-water over a gentle fire, in a vessel close stoppt, and Luted, for twelve hours then boyl them as long, strain the liquor and add to the same ingredients eight pints more water, three ounces of *Liquorish*; *Nutmegs*, and *Coriander seeds* of each one ounce, boyl them four hours, strain and mix both together, let them settle; drink every day two quarts for thirty dayes, (restraining all other liquors) I commend this easy firm way of cure to the world, hoping the diseased will sin no more, least a worse thing befall them. observing also these following directions. *Receipt for Diet drink for the Pox.*

Those who have *Ulcers* in the Privities or Throat, may touch them dayly three or four times, with a little *Allum* water, or burn'd *Allum*, mixt with *honey*, or Oyntment called *Aegyptiacum*. And by degrees, being patient and penitent, and using soberly, the former directions *Diet-drink* and *Pill*, the *Preserver* of men may avert his judgements, and a Cure will come in course. *The same Drink in many other Diseases.*

APultis Those who have any swelling in the *Testicles* may apply this or the
 for sweld like *Pultis*,

C Members Take of grated bread, three ounces, of Linseeds and Camomile flowers in
 powder of each one ounce, of Mallows leaves cut, two handfuls, boyl the
 bread and leaves in water two hours, till there be but little moisture, then
 add the powders, and two ounces of Oynment of Roses, use part of this
 morning and night, spread it thick upon a thin bladder and linnen over it,
 bind up the affected parts, *Tul*-fashion, and, if possible, with a *Tuls*, to
 appeale, discuss and cure that torturing tumour.

Swelling in the Groin requires the same, or some such like *Pultis*,
 adding, three ounces of White Lilly roots boyl to mash, one ounce of
 Foenigreek seeds, allowing as much fresh hogs Lard or Butter, as will keep
 it very moist. This will ripen and break the painful swelling, which must be
Pultis Lanc'd (or ought to be) and kept tented, with *Basilicon*, and emplastered
 for a with *Apellitot*, till the tumour be quite abated, then cured as a wound; but
 Bubo. in this Distemper, take no Pills save only to keep the body Laxative; till
 the swelling be near well, then purge freely with this Pill, and drink the
 Diet Drink for a fortnight or longer as need requires.

ADVERTISEMENT.

Counter- Beware of pretenders to this Pill especially one *Sandbrook* Apothecary
 feits ex- near *Delann's* head in *Blackfryers*, who vends a Pill call'd *De Duobus*,
 pos'd. for *Delann's* which (I call God to witness) hath above twenty *Ingredi-*
ents more than that call'd *de duobus* hath in it, which that *Conscientious*
Gentleman sells. (his own servants will averr the same) And I declare
 that the true *Delann's* *PILL*, is not sold at any *Apothecaries* in *England*,
 and am ready to justify the same; and dispute the Preparation and
 Effects of this or of any thing here inserted, according to the *Art* of
Physick or *Pharmacy*, in the presence of the *Colledge*, with the greatest
Critick or *Detractor*.

And, as to inserting names, and Letters of Cures as many do, I have
 not room, but, if I should do so, I ought to speak also of miscarriages,
 which *Sennertus*, *Riberius*, *Willis* and all true Physicians did, whilst
Quacks (that read their works) being translated into *English*, (else they
 could not) pretend to make men immortal, though I can prove plenti-
 fully; they have been great friends to all *Sextons*, and to some *Persons*
 who were weary of their wives, and yet sell *Bromfields* Pills: oh Co-
 vetousness! oh Ignorance! the Parents of Murder; who shall trust to his
 Medicine who was neither bred to *Physick* or *Grammar*, nor knows how
 to chuse a *Drugg*, and yet pretends to be a *Physitian*, an *Aesculapius* in a
 month? when the most acute, must serve Eight years Apprentiship, la-
 boriously, and then, not one in three able to undergo his Examination, or
 Drugs.

qualified only to compound, not daring, (in seven years more) to administer or prescribe a dose of Physick: I leave it to any sober man to judge, but, since *ιαβός αἰθέρα* γοῶντι πάλιν νόσος, I will desist.

In Laudem Authoris.

*Medicine Apollo clays, Spagyrick Art
Is Thine Great Laun; Now Chymists do not Thwart
The Galenists; all Reconcil'd by this
Thy Posthume Pill, the Rich and Poor Mans blifs.*

Sr. Robert Sprignell Knight and Baronet, one of Delaun's Grandsons

*So shone the Sun, and Python did destroy,
As you those Ills which Mankind do annoy,
Do Conquer, since these Arts you do Employ.*

A. Oldis Delaun's God-son.

These Pills are Sold

At Delaun's Head a Feather-maker in Black-Fryers, next door to my former Habitation by Ludgate.

By Mr. Horn at the North Entrance of the Old Exchange. Mrs. Hope at the South Entrance. Mr. Leech at the Crown in Cornhill. Mr. under St. Dunstons Church. Mr. Carter at the flying Horse in Fleetstreet, Mr. Battersby at Thavies Inn Gate, all Booksellers.

Mr. Leeson in Bow lane the Famous Tooth-drawer. Mr. Searle in Pyc-Places
Corner the Great Operator in Deafness. Mr. Appleby at the Apple Tree in for Sale.
Pickadilly, near the French Church. Mr. Charles Branden Cheesemonger in
Clare Market. The five Bells in Chancery lane, Cutler. Mr. Mountague in
Fleetstreet, Tobacconist. Mr. Morgan the Kings Grocer in Henrietta
street Covent Garden. Mr. Weatherspoon Barber Chyrurgion in Long Acre.
Mr. Eads Distiller in Leather lane. Capt. Grant in Moor-fields. Mr.
Lovell on London bridge, (Distillers.) Daves Coffee-house at Smithfield
Bars. Mr. Hatton Vintner. Mr. Seager Tobacconist. Mr. Parruck
Grocer. Mrs. Harvey Thred-shop, (these four in Holbourn.) Mr. Fages
in St. James's Market, Grocer. Mrs. Milward at Westminster Hall Gate.

Grocer in Red-Cross street. Mr. Hubbert Tinman in Upper Shadwell. Mr.
Smith over against the Kings Bench at the Bird Cage in Southwark. Mr.
Smith

Places *Smith* stationer next *Temple Church*. Mr. *Lyon* at the *Dog* within *New-
gate*. Mr. *Gardiner* Herbalist in *Newgate* market. Mr. *Smith* a stationer o-
ver against *Bow street* in *Covent Garden*. Mr. *Page* Drugster at *Charing-
Cross*. At the *Tobacconists* next to the *Cock-Alehouse* at *Temple bar*.
Mr. *George Shipside* Distiller in *Stocks market*.

Jonathan's Coffee-house in *Exchange Alley*, *Jo's* in *Fuller's Rents*. *Smith's*
in *White Fryers*. *Dison's* Coffee House at *Linchouse* corner *Sandford's* in
Salisbury Court. *Carliles* near *Guild Hall*. *Richard's* by *Temple gate*.
Sold be-
yond Sea. *Man's* at *Charing Cross*, (all Coffee houses.) And at most other
Eminent Coffee-houses and Noted Cities and Towns in the Kings
Dominions and Plantations.

And at *Delaun's Head* in *Baldwin's Gardens* in *Holbourn*, (being
lately remov'd thither from *Black Fryers*) where also are Sold,
and exactly Prepared,

Dr. Tern's Cordial Purge, which *Hind*, *Daffy*, and others call
Elixir Salutis; or *The Never Failing Cordiall*: *Dr. Willis's* Lozenges,
which *Buckworth* and *Piercy* call their's: *Elixir Proprietatis*, *Matthew's*
Pills, an absolute *Worm-Powder*: *The Lady Jove's* Drops for the Eyes:
Spirit of Scurvy-Grass, *Gripe Water*, with Printed Directions.

I mean the *Compound Spirit of Scurvy-Grass*, Prepared according to
the Famous *Dr. Le-Feuvre*, which, as the Learned *London Colledge* does
not only Approve of, but Applaud and Prescribe, I hope none may
Condemn.

And, Note, that six or more Vendors of this Spirit, do all
pretend to be the Inventors of it, when alas! this Person expos'd it in
Print (for the Publick Good as plain as *Asitribate*, in the *London Di-
spensatory*) Many Years before any of these self-ended Men offer'd it to
Sale: And I farther Avert, that 'tis so far from being a Secret or Ra-
rity, that 'tis as easily made as common *Rose Water*.

This I Sell (either Plain or Purging) at six pence the Glass, by whole-
Sale, with Printed Directions, to be sent to any part of *England*, or
Retail in *London*.

I also give Advice for Love, and proper Medicines in any Disease,
very Cheap, and to such as have *Apothecaries* to their Friends, I Prescribe
Bills in Latine, which none but those that cannot will Refuse; And
hereby you may distinguish Artists from Impostors.
